Professional Statement

Detail-oriented fresh graduate in cybersecurity with a strong foundation in networking and security looking to pursue different professions to expand knowledge and skill in cybersecurity.

I am committed to develop and improve my problem-solving, critical thinking and quick decision-making as well as learning programming such as Python.

I value protecting people, their information and privacy and experience with different work, collaborating with other people.

My interest in cybersecurity is knowing the security depth of the system and architecture, exploring how the attack works and understanding how to protect the data and people.
